

# PREPARE THE DATASET TEAM

ID : PNT2022TMID39035

After loading the data, we must prepare it.

- Prepare calculations for the fields for Year, Month, and Day, as well as the associated Navigation path.
- Produce a few other calculations, including target sales, minimum sales, maximum sales, and middle range sales.

The screenshot shows the 'Data module' view in IBM Cognos Analytics. The table displays customer information with the following columns: Customer ID, Customer Name, Segment, City, State, Country, and Postal Code. The data is as follows:
